

MACHINE INTEGRATION MODULE WITH SHOP FLOOR MONITOR

ShopEdge Software is the leader in providing a highly adaptable, industry focused, ERP solution that streamlines shop floor manufacturing from raw materials to finished goods for the Metal Stamping Industry.

ShopEdge Software has bridged the gap between ERP software and the shop floor with the introduction of our Machine Integration module. This module eliminates cumbersome and error-laden data entry by pulling important production information directly from any machine, with or without a PLC device.

See your shop floor in real-time with our new Shop Floor Monitor. Valuable production information is captured straight from the shop floor to feed the highly visual, information rich display. It is easily accessible anywhere from a web browser, or directly from our Android application.

Direct communication between ERP software and the shop floor provides accurate, real-time data as a foundation for our powerful business intelligence reporting. Our wide selection of reports provides insight to help increase your OEE, decrease downtime, and improve overall profitability.

- Automatically populate valuable production data with minimal operator input.
- Integrate with any machine, either directly with a PLC, or using intermediate hardware.
- View machine data and job information remotely via our Android Application.
- Know exactly when machines are down, why they are down, and troubleshoot recurring issues.
- Gain access to granular machine data to help improve OEE.
- Improve production efficiency, and maximize resources.
- Benefit from an extensive library of production reports that enable company decisions to improve profitability.
